The Lions Club
Cody, Wyoming**

BUFFALO BILL CAMP GROUND -- 61 MOD-ERN LOG CABINS; BATHS; STORE AND FILLING STATION. SEE OUR ZOO --- ELK, DEER AND BUFFALO. EAST CODY MAIN STREET.

FOLLOW GUIDE CLOSELY

It will be necessary that you follow this guide closely if you are to locate the points of interest listed below. If en route to the Park, set speedometer at the Irma Hotel corner before leaving Cody. If exiting from Park via Eastern Entrance, set speedometer at the Park Ranger Station. Many of the signs erected by the Forest Service will aid you in locating the points of interest.

The resorts and places of business listed below in black face type have telephone service. You will pass through one of the best game regions in the United States. Elk, moose, deer and mountain sheep are often seen from the highway.

CODY, WYOMING

Population 1,500.

Altitude 5,000 feet.

Founded by the late Col. William F. Cody (Buffalo Bill) in 1900. The county seat of Park county, situated in the center of a vast stock-growing and agricultural community.

The best educational facilities in northern Wyoming, with five churches, public library and strong fraternal and community organizations.

When in Cody visit the Buffalo Bill museum at the west end of town. This museum is a memorial to the greatest of all pioneers and scouts, Col. Wm. F. Cody, and is filled with many interesting relics of the pioneer days of the West.

SIDE TRIPS FROM CODY

Shoshone cavern, a national monument, located four and one-half miles west of Cody on the Park road. One of nature's wonderlands, containing 500 rooms, extending into the heart of Cedar mountain several miles. South Fork valley is a beautiful drive from Cody, extending 50 miles to the southwest. A broad valley in which are located prominent tourist resorts, such as the Valley Ranch, the Double L Bar, Majo Ranch, TE Ranch, formerly owned by Col. Cody, Aldrich Lodge, and many other fine resorts where tourists may secure accommodation by the week or month. The DeMaris Needle Bath Springs are located four miles west of Cody via the northside road, with a modern plunge and hotel facilities.

A drive of 25 miles to the northeast of Cody takes you to the town of Powell, located in the center of the already developed area of the vast Shoshone Irrigation district. This is one of the garden spots of the world, and one of the United States Reclamation Service's most successful projects.

CODY COMMUNITY IN BRIEF

Fifteen thousand acres of fine farm land is irrigated by the Cody Canal, constructed 28 years ago by Col. Cody and the Hon. Geo. T. Beck. Eight thousand fertile acres are watered by the Lakeview canal, and numerous small ditches supply water for many more thousands of acres of land which are tributary to Cody.

SHOSHONE DAM

Height, 328 feet. Thickness at base, 108 feet. Thickness at top, 10 feet. Length of crest, 200 feet.

Capacity of reservoir, 456,000 acre feet. Area of water surface, 10 square miles. Length of reservoir, 10 miles. Maximum width, 4 miles. Maximum depth, 233 feet. Length of spillway, 300 feet.

Work begun November, 1905. Work completed January, 1910. Total cost, \$1,354,000.

This mammoth structure was built for the purpose of irrigating some 300,000 acres of land, including the Powell, Garland, Ralston, Frannie, Deaver, Willwood, Highline and Oregon Basin divisions of the Shoshone project. The Powell, Garland, Ralston, Frannie and Deaver units already have been completed and the land is now being cultivated. The Oregon Basin and Highline divisions, the two major units of this gigantic reclamation project, are still to be reclaimed, with prospects for the work to go forward within a few years.

EXCELLENT PHOTOGRAPHS of the Shoshone Dam and Canyon and Cody Road to Yellowstone in sets of twelve or more, size four by six inches, may be obtained from F. J. Hiscock, Cody, Wyoming, at \$1.00 per set.

Shoshone National Forest

The creation of a reservation for the protection of timber by President Harrison, under the Act of March 3, 1891, was the nucleus of the present Forest which has been added to by succeeding proclamations until the present area is more than a million and a half acres of the ruggedest mountains in the United States, containing scenic wonders nowhere surpassed and some of the largest big game herds in the world.

The headquarters of the Shoshone Forest is located at Cody, the outfitting point for trips through the Forest, Yellowstone Park and Jackson's Hole. Here may be obtained licensed guides and everything necessary to give the visitor a delightful outing.

Your cooperation is desired in keeping fire out of the timber and the camps clean.
